

RETAIL SUPPLIER LINK FOR NAVISION

RSL - Retail Supplier Link

A Supply Chain System Specifically Designed for distributors, manufacturers, and importers who sell to large retailers.

Key Retail Compliance Benefits:

- All modules and functions integrated into a single Supply Chain system providing "Total Access to Data".
- EDI mapping and translation tool maps EDI elements directly to the database fields.
- Packaged EDI maps available for major retailers.
- Extensive Cross Reference Engine for customer, distribution center, store, item and unit of measure definition.
- Pack Line Scanning and Standard Pack capture package level detail for the Advanced Shipment Notice.
- Shipping Manifest System for Packaged and LTL carriers.
- Bill of Lading for planning and executing shipments.
- Label Formatter for UCC compliance labels and custom formatting.

Built Inside Navision

Retail Compliance is perhaps the most important part of a Supply Chain System for a retail supplier, yet many companies use a number of software packages, often not integrated, to accomplish this task. The result can be a high level of chargebacks and inefficiencies in the day-to-day operation.

Retail Supplier Link, built inside Navision, takes a unique approach of integrating all these functions inside a single system, providing "Total Access to Data". From the incoming EDI Order to shipment, advanced shipment notice, and invoice, the user has a common user interface and access to all the details that makes up the day-to-day operation.

Increased Customer Satisfaction

With superior visibility to real-time information, Retail Supplier Link provides you the tools necessary to automate and streamline your business processes which enable you to respond to your customer demands on the fly, and with accurate information.

Respond Quickly to Changing Requirements

Whether setting up a new Trading Partner or responding to changes with an existing one, Retail Supplier Link provides you the tools to quickly and efficiently comply with your customer's changing requirements. How much time and money are you spending on setting up and maintaining your trading partners now? Retail Supplier Link empowers you to make trading partner changes via a mapping tool rather than with costly reprogramming. Would you like to apply that money to your profits rather than your expenses?

Total Access to Data

The EDI Trace window shows an example of all transactions that were created and associated with an incoming 850 Purchase Order. The user can then drill down to view any document or transaction.

The screenshot shows a window titled "E.D.I. Trace" with a "General" tab. It contains a search field for "E.D.I. Internal Doc. No." with the value "EDI00015" and a "Find" button. Below is a table listing various EDI documents and their counts.

Table Name	No. of R...
▶ E.D.I. Recieve Document	1
Sales Order	3
Posted Sales Shipment	2
Posted Sales Invoice	1
E.D.I. Send Document	1
UCC 128 Sequence	1
Bill of Lading	1

At the bottom of the window are "Show" and "Help" buttons.

Software Requirements

- E-Ship uses OCX controls to interface with the FedEx API, and communicate with electronic scales, therefore, if these granules are used, the customer must also license Navision OCX support.
- Navision client running under Windows 2000 or newer.
- Internet connection required on all shipping stations.

Hardware Requirements

- Wedge scanner, Symbol model 4000 or equivalent.
- Electronic Scales using RS232 interface (Check currently supported models).
- Eltron or Zebra barcode printer capable of printing at least 4" X 6" labels. (Eltron printer required for FedEx labels)
- Computer workstation, 1 GHZ processor, RS232 serial port, parallel printer port, and hard-wired network connection.

About the Developer

Lanham Associates began its relationship with Navision in 1997 by creating the product's first distribution functionality, Advanced Distribution. A certified MBS ISV, Lanham Associates, has been creating complementary supply chain planning and execution products inside Navision ever since.

Current products include Retail Supplier Link (RSL), EDI, E-Ship, E-Receive, Advanced Forecasting and Procurement (AFP), Credit Card Processing, ADCS Warehousing, History Management, and Security Management.

Lanham Associates maintains high standards for product excellence, and has been the recipient of both the President's Club and Inner Circle Awards each year since being affiliated with Microsoft. Lanham products are available through the extensive Microsoft Business Solutions reseller channel.
