

## OGFS™ the all-in-one software for Oil & Gas Field Service and Supply

Oil and gas field service and supply companies face unique challenges, both in their operations and in their back-offices, where mounds of paperwork and spreadsheets result in administrative labor consuming a higher percentage of operating profits than most industries. With Computer Business Solutions' OGFS for Microsoft Dynamics, operations can run more profitably and more accurately with less effort.

### IMPROVE PROFITABILITY and CASH FLOW:

- **Increase cash by 1% to 4% of sales** with mobile apps capturing field ticket information to automate the invoicing process and eliminate manual invoice creation.
- **Shrink back office labor cost by 50% to 75%** by reducing the work and eliminating duplicate entry.
- **Reduce maintenance costs**, and returning trucks and equipment back to revenue-generating service faster.
- **Simplify deployment, rental, and sales** of equipment, tools, and **minimize equipment loss**.
- Provide **real-time visibility to profitability** and performance at any level, entity, or group.

Our founder started his career designing software at **Exxon/Mobil**. At CBSi he works alongside a talented team of developers and business consultants to create features specifically designed to boost the profitability and productivity of oilfield service and supply companies (see features listing). CBSi now provides valuable advice and the most highly effective software tools recognized and certified by Microsoft for this industry. We share our experiences via briefings to oilfield service and supply executives and their advisors, including our most popular recent topic: **"21 Strategies to Increase Oilfield Profitability & Cash Flow"** ([www.cbsi-corp.com/briefing](http://www.cbsi-corp.com/briefing)).

OGFS runs embedded within Microsoft Dynamics NAV accounting, or connected to other accounting software, or as a standalone solution for operations. We upgrade clients from legacy software, RTMS, QuickBooks, Excel, GP, and other databases.

#### OILFIELD TESTIMONIALS

*"What we can now offer gives us a superior edge over our competitors"*

*"We looked at 5 products and selected yours because it's built for our industry, it's not overly engineered & complicated, and you have great references."*

*"I'm especially happy with the reporting and billing. It's streamlined the business and made my job easier and faster."*
